Great response and a quick set up to repair my water damaged wood flooring. Von came up with a genius solution to replace the entry area by the garage with tile, we did not have enough wood pieces and the product is no longer made. He could have tried to sell me thousands of dollars of flooring, but instead came up with a perfect solution. Von was very thorough in explaining the process and he quickly worked me into his busy schedule. Job complete and it looks fantastic. The installers did a great job and were respectful and clean. I would highly recommend this company!
