Subject: ReBath

I went to see Austin at Re Bath in Tucson and was SO happy with their service. I have a 7 week wait (which is a good thing, by the way, because it says what good work they do) and am anxiously waiting for my son's new bathroom. He is mentally handicapped and 33 years old with a mental age of about 10. I explained the problems we have and they worked together to design a shower door for him that will not fall apart like the one that came with our house. He is not easy on sliding doors and they are building him a special enclosure for his mental ability. They said they have not done this before but they were going to make sure it was done right and are going to guarantee that it will work for him. I am so impressed with their helpful attitude and building this according to my son's disability. What a crew! I have always been a good listener to your program and have used several vendors suggested by you folks. Thanks again for the BEST advice!!!!
