Comments: Just wanted to give you a little update on our addition of solar power to our house. I have been working with Kevin Wall from Mr Sparky in Chandler. He has been super, as has everyone else at that company, from Mark to everyone in the office, great folks. He is working on changing our 200 amp main panel to a 225 amp panel to accommodate the size of the solar array. He said this is a very new panel and may be one of the first installed here in the valley. We are waiting for clearance from SRP and hope to install on 8/17.

I have also working with Dan at Lyon's Roofing since we want to re-roof before the solar panels are put in place. This is another great company to work with. Everyone is very organized and helps keep everything on track. Planned start date is 8/31.

Finally I will be contacting Advanced Home Systems so they can coordinate with Mr Sparky (Kevin) about a possible disconnect/reconnect of their computer. Again, I can't say enough good things about Eric and Steve. Both are so helpful and ready to give you the time to ask all the questions you can think of.

Hopefully, the solar panels will go on in the 3rd week of September.
