

Thank you once again for your list of referrals. We had Dave from Dave's adobe Painting come out and service and paint our stucco house. I say service because of the work that he put into patching and putting stucco patch over the elastomeric caulk so there would not be smooth lines under our new paint. Pulling the rocks and sand away from the walls of the house so they didn't get painted was another nice plus. I had a couple of items that needed to be worked on after the job was finished and gave Dave a call and he came right over and took care of everything....a very good Man.

Thank you,  
Vivian and Harry Decker
