Comments:

Had a furnace a/c put in by [REDACTED] 3 years ago. They really played my pocket book like a fine violin, I've found out. One of the things they sold me was a humidifier. It has never worked a season without breaking down. The straw on the camels back was when it broke down less than 2weeks after they "fixed" it for 180\$. Since enough is enough, I looked at your recommendations and called Integrity. Very impressive help on phone and today they sent over three men to look at it. Fixed it and have just left. They were very impressive. This is the second time I've used a Rosie on the House contractor and it will never be the last. From now on, if it's not Rosie certified, then it's not. Thanks to you and to Integrity.
